About Ambiente:

At Ambiente we have been producing one of the finest collections of high quality napkins and table decorations in Europe for more than 25 years. We take pleasure in our work, and we see it as our job to convey that feeling to our customers through our beautiful collection of napkins and table accessories, because that's what we do.

Our goal is to create products that bring both pleasure and a cozy ambience to the home. Strong collaborations, unique designs and superior quality in a harmonious collection are all benchmarks of our collection, which we are proud to distribute with our sister company, Paperproducts Design (PPD), in North America as well.

Though our US line consists mainly of high quality napkins, guest towels and pocket tissues, we are also proud to offer a range of matching kitchen towels, table cloths and table runners too - with more exciting articles to come in the future!

Our collections are updated twice a year, once for the Spring and Summer seasons, and once for the Autumn and Christmas seasons too. In our own design studio, new artist designs and feedback from our customers are taken into account together in the development of our new releases, and having the highest quality line in materials, execution and design is always a top priority for us. The complete production of and the logistics behind our napkins, from initial concept and proofing, to the shipping of box-packed orders, is all done in-house so that we can check and guarantee the quality at every stage. A fast delivery time is an additional advantage of having everything under one roof as well, and the launch of each collection is accompanied by a hard copy release of our catalog and a downloadable digital PDF too.

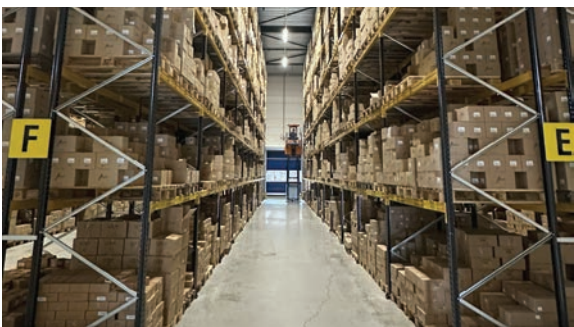

Sustainability:

At Ambiente we want to leave the greenest footprint possible in the areas of both Energy and Climate. We took this into account when building our new office, warehouse and production facility in Beugen, Holland, which was built with sustainability at the forefront of our mind. An example: a heat pump installation that can either heat or cool the entire building instead of traditional HVAC systems was installed, saving energy and dramatically reducing greenhouse gas emissions as well. In addition, only energy-efficient LED bulbs and 100% green power are used to light and power our facility.

In the production of our napkins, especially in their printing, we conscientiously use only environmentally friendly, water-based inks without chemical solvents, and the tissue paper that we use for our napkins, guest towels and pocket tissues consists of only sustainably sourced and produced materials.

FSC® Certified:

We are proud to have been FSC® certified since 2011, which ensures that our napkins are made from wood from responsibly managed forests and/or recycled materials. The tissue paper that we process is made of FSC® Mix certified materials, and we are proud to affirm our commitment to the preservation of our forests for present and future generations to come.
